

THE BLAIRMORE ENTERPRISE

VOL. XIII, NO. 41

BLAIRMORE, ALBERTA, THURSDAY, OCTOBER 11, 1922.

\$2.00 YEARLY

OFFICIAL OPENING OF NEW CHURCH AT BELLEVUE

The official opening of the new Methodist church, and Community Building at Bellevue will take place on Sunday, October the 22nd.

The dedicatory service will be held at 11 a.m., conducted by Rev. A. A. Lytle, assisted by the pastor, Rev. Harry Peters. In the afternoon a young people's service will be addressed by Mr. Lytle. At 7:30 p.m., Rev. Mr. Lytle will be the speaker.

On Monday, October the 23rd, a grand Thanksgiving Supper and Concert will be held. Supper will be provided by the ladies of the church and congregation and will be served from 5 to 7 p.m. The concert will begin at 8 o'clock sharp. The following Hillcrest artists will assist: Mrs. Frank J. Smith, Mrs. Pinder, Mr. Altham, Mr. Tonks, Revs. W. T. Young, D. K. Allan, A. A. Lytle and J. Pinder will deliver short addresses.

The Bellevue choir will render special music at all services.

Services will be continued on Sunday, October 29th, when Rev. Thomas Powell, superintendent of missions, will be the speaker at 11 a.m., and 7:30 p.m. The Young People's service in the afternoon will be addressed by Rev. W. T. Young, of Blairmore.

MEN'S OWN AT COLEMAN

The Men's Own of the Institutional church, Coleman, got away to a good start on Sunday, October 1st. An address was given by the president, Robert Holmes, on the subject of "Father's Business," which was both interesting and practical. The officers for the ensuing term are: President, Robert Holmes; vice-president, Tom Parry; secretary-treasurer (pro tem) Rev. D. K. Allan.

The difference between one man and another is not mere ability—it is energy.—Arnold.

WORK ON FOUNDRY BUILDINGS COMMENCES

Contractor E. J. Pozzi on Monday set a gang of men and teams to work on the site for the new foundry and iron works, and in the course of a few weeks several substantial buildings will be in course of construction.

According to present plans, three buildings are to be erected immediately—stores and offices, machine shop and main building.

The stores and office building will be 50 by 30 feet, of frame construction with stucco finish.

The machine shop will be 80 by 50 feet dimensions, built of hollow wall with stucco finish.

The main building will be one hundred feet long and thirty feet wide, walled with corrugated iron.

All three buildings will be fire proof, and the machine shop and main building will be equipped with the most modern machinery.

Work of construction will afford employment to about forty or fifty men, and when completed it is planned to employ about fifty men around the works.

NEW COURT HOUSE PRACTICALLY ASSURED

The site for the new court house has about been decided upon and is indeed ideal, as it will form a desired connecting link between the east and west ends of Blairmore.

The site now practically decided upon is on five lots immediately east of Second Avenue fronting on Victoria Street and adjoining two lots on which will be erected a bank building.

We have not seen the plans for the new court house, but it is understood that the building will be similar in size and plan to the court house at Macleod.

The contract for the new bank

DEPORT TO CANADA ENJOINED BY COUNCIL

The regular meeting of the town council on Monday night, was attended by Mayor McLeod, Councillors Morgan, J. Angus McDonald, A. Morency, W. McKee and J. A. McDonald.

The minutes of previous meeting were read and approved and the following accounts were passed for payment, subject to approval of committee: Blairmore Hardware \$21.50, J. Shaver \$28.50, J. Korne \$22.00, Mrs. Metzler (rebate of deposit) \$25.00, S. Ennis \$17.00, J. Howe \$47.50, G. Lang \$46.00.

The application of S. Ronco for permission to erect a garage, 12x14, at the rear of his residence, was granted.

Communication from the Crows' Nest Chapter of the I.O.D.E., asking assistance of the town towards erection of a war memorial was ordered filed. Council took no action in the matter.

F. M. Pinkney and Dr. Olivier appeared as a deputation, from the Blairmore Arena Co., asking for assistance in the way of rebate of taxes paid or a grant towards the arena. It was shown that the profits of last season had already been invested in improvements around the arena, and that in addition to the installation of a heating system the matter of equipping a gymnasium was already in progress. To do this required more funds and as the arena is intended solely for the benefit of the community at large, the deputation felt that assistance should be forthcoming from the town.

Councillor J. Angus McDonald could not see why the arena should be granted exemption from taxation and felt that as the taxes for this year had already been paid, the council should take the attitude of "What we have we'll hold!" He felt that the arena was a business proposition as far as the shareholders in it were concerned and whatever benefit the public were to derive they would pay for.

Councillor Morency somewhat supported Councillor McDonald, and felt that it would be doing an injustice to Councillor Picariello to grant tax exemption to the Arena Co. for any period since the application of Picariello for exemption from taxes for a period of five years in connection with a proposed garage was turned down. Councillors Morgan and J. A. McDonald were strongly in favor of asking a grant to the arena, if necessary, of the full amount of taxes paid this year. They realized the arena as a great community enterprise as the best thing that ever struck the town.

Solicitor Putnam failed to see how the arena could be exempted from taxes, but felt that it was perfectly within the power of the council to make a grant to the arena.

While a vote was not taken, it was plain to be seen that all, save one, of the councillors favored the idea of making a substantial grant to the arena. The matter will be voted upon at next meeting.

The council were in accord with a proposition advanced by the W. L. Canadian Collieries, whereby the company would offer a court house site to the government, and site to be about midway between the telephone exchange building and the office of Capt. W. A. Beebe.

By-Law No. 77, governing and supervising dance halls and public dances, received three readings and was finally passed. This by-law will be noticed elsewhere in this paper.

Building has already been let and the building will be imposing and attractive. It will occupy two lots next east of Second Avenue. Work of excavation for foundation started today.

There are times when Fortune begins but cannot complete her work.

POLICE MAKE BIG CAPTURE

The biggest capture of real booze since the introduction of prohibition and the Alberta Liquor Act, was made by the A. P. 14, assisted by a plain clothes squad, on Monday night or early Tuesday morning of this week.

The police had reason to suspect that liquor was to be shipped on some passing freight from Crows' Nest towards the prairie and a close eye was kept. Word on Monday night drew the police to Burnin, where upon arrival of a freight train from the west the suspected car was approached and upon opening the door two men were found guardedly in the contraband. Both men were taken into custody and together with the booze were taken to Blairmore barracks to await developments.

The liquor, in some amounts to a but one hundred and one cases of elegant stuff and is valued in round figures at \$5000.

The two men appeared before Magistrate Gresham yesterday afternoon and were each fined \$175 and costs under the liquor act, with an additional fine of \$50 each under a charge laid by the C. P. R. The magistrate ordered the liquor confiscated.

Man is misset: we repeat, without thought, the opinions of some third person who has adopted them without inquiry.—Durand.

COLD-BLOODED MURDER NEAR VULCAN

A cold-blooded murder took place at Vulcan at 10 o'clock on the night of Friday, October 6th, when C. H. Kelly, a respectable farmer and old timer, who lived nine miles northwest of Vulcan, was deliberately shot through the head with a shotgun.

Otis Dorch and his younger brother, 19 and 17 years of age, respectively, are held awaiting trial for the deed. Both lads were located at the railway depot, having purchased tickets for the States, via Spokane.

The elder Dorch is said to have borrowed a Ford car from a garage and the shotgun from his father, saying that he was going out bird shooting. Following the shooting, the car and the gun were returned. The deceased Kelly was about forty-four years of age.

The two lads appeared before Justice Barker on Tuesday and after preliminary hearing were remanded for trial on the charge of murder. The case will likely be heard in January.

LADIES CURLING CLUB

The annual meeting of the Blairmore Ladies Curling Club will be held at the home of Mrs. F. M. Pinkney, the president, on Tuesday afternoon next, October the 17th, at 3 o'clock. All members and those desirous of joining are requested to attend.

HEATING STOVES

Our Greatest Asset

The greatest asset of any country is not its accumulated gold, nor its areas of agricultural land, nor its mineral wealth, nor great manufacturing industries; neither is the greatest of all assets to be found in military or naval power, nor even in great universities of learning and strong, influential churches.

The greatest asset of a home is not the dwelling place no matter how fine it may be; it is not a comfortable bank account which provides a guarantee against want and assures comfort in declining years.

No, the greatest asset of a home, and of the nation which is only as strong as the homes of which it is composed, are the children. Take away the children and the home soon disappears and the nation dies.

Few, if any, people will deny the truth of these statements if faced with the necessity of making answer to them, but how many thousands and millions by their daily actions practically deny their belief in these truths?

The world regards war with horror and deprecates the loss of young men to the best years of their life. The taking of life is accepted by the law as the greatest of criminal offences. Yet in this so-called Christian era, and boasted twentieth century civilization, conditions are calmly accepted, even legalised, which in their effect on the race are more deplorable than war, and worse than murder, which only kills the physical body, while the conditions referred to destroy the intellect, ruin the body, and kill the soul of man.

These thoughts are engendered by reading the report of the latest United States census figures which reveal the astounding and alarming fact that approximately 1,000,000 children between the ages of ten and fifteen years, out of a total of twelve million children of those ages, are engaged in work. This is child labor with a vengeance in one of the world's most highly civilized and prosperous countries, and a country which has long boasted of its great national public school system.

What does it mean to the future of the United States, and of the world, to have one out of every twelve of its children between the ages of ten and fifteen engaged in gainful occupations instead of being in school? One accepted United States paper, which admits that statistical figures are cold, unfeeling things, seeks to prevent the matter in another light. It says:

"One million underprivileged children, destined to grow to be underprivileged men and women, to recruit the ranks of the half-witted, the gamblers, the incompetent and the criminal."

"One million boys, less capable of exercising the great function of the ballot because of poor equipment for reasoning power and decision."

"One million derailed intellects to be the easy prey of prejudice, class consciousness and hatreds. Understated minds that will follow the parades of the crafty and the conceited."

"One million prospects for the I.W.O., the Bolsheviki, and the other exponents of half-baked theories of government."

"One million people whose darkened minds will inevitably pull down the standard of art, music, drama, and life in all its ramifications."

"One million little folk, at heart innocent of all these and other dire perils for their country, with a real and just grievance against the one hundred million who permit this immeasurable folly of child labor to continue."

And this paper might have added: "One million prospective fathers and mothers of the next generation weakened, not alone in mind, but in body for the discharge of their great God-given duties and responsibilities."

Fortunately, conditions in Canada are vastly better and in those Western Provinces compulsory school attendance laws, rigidly enforced, operate to largely remove this child labor menace. Nevertheless, cases are by no means lacking where parents strive on one pretext or another to keep their children from school to do work about the farm or home. These short-sighted parents seem to think the immediate and rather puny labor of their children is of greater value than their permanent equipment for life's work and future citizenship.

Recently, in one of these Western Canadian Provinces the school attendance age was raised by one year, but only after a rather vigorous fight, while the proposal of a two-year advance in order to include all children up to 16 years was rejected.

Yet surely the whole intellectual and economic life of the country would be bettered and strengthened if children were given a maximum education for their life's work. Our greatest asset should be encouraged and developed; not restricted and retarded.

Make Bondage a Thing of the Past!

EVERY man or woman who has come to depend upon the morning cup of tea or coffee is a slave to the use of Caffeine.

Caffeine, the irritant in tea and coffee, often ruins the system of the joy of living—the priceless blessing of bounding spontaneity, naturalness and cheerfulness.

It is easy to snap the bonds and free the surge of rich, red blood through your veins and arteries. Thousands of sufferers from the effects of caffeine have found quick and permanent relief in Instant Postum—the beautiful, quick beverage made from roasted wheat.

Start TODAY. You'll find the flavor and aroma both delightful and satisfying.

Sold by grocers everywhere!

Instant Postum FOR HEALTH

"There's a Reason"

A generous sample of Instant Postum sent, postpaid, for 4¢ in stamps. Write: Canadian Postum Cereal Co., Ltd., 45 Front Street, St. Thomas, Ontario.

When Villages Prosper

Prosperity of the Town has a Direct Bearing On Prosperity of Rural Life

No country can really prosper unless its farmers are prosperous, said Mr. Leithan, in an address to farmers the other day, and no farmer will be happy and successful unless the small villages and towns in which the farmers' families have access are highly prosperous. "Remember," said Mr. Leithan, "that you have an interest in building up towns and villages. Such is your home market. Patronize your village butcher. Get friendly with your town banker—he's always glad to help and advise. Buy your furniture, your groceries, your implements, in your nearest town. Every cent you spend in town remains in town. The value of your land, the ease with which you secure help, the happiness of your family, the likelihood of the boys staying on the farm—these all depend not on the farm so much as the nearby villages. By increasing the prosperity of the village, you make your farm more valuable and your life more pleasant."—St. Mary's Journal.

The Man With Asthma almost longs for death to end his suffering. He needs almost only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

Civilization

What was once the lower class is gradually absorbing and identifying itself with what was once the middle class. Ultimately, as social conditions improve still further, it will proceed to identify itself with the aristocracy. There will no longer be blue blood or green blood or red blood. The only blood that will run in our veins will be the blood of free and competent citizens of a great democracy. We shall, in other words, have arrived at the exact position reached by Athens twenty-five hundred years ago.—London Daily Express.

A GOOD MEDICINE FOR THE BABY

Nothing can equal Baby's Own Tablets as a medicine for little ones. They are a favorite, mild but thorough action, and never fail to relieve constipation, colic, colds and simple fevers. Once a mother has used them she will use nothing else. Concerning them Mrs. Salome Pfeiffer, St. James, Tex. writes: "I always keep a box of Baby's Own Tablets in the house. They are the best medicine I know of for little ones and I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The statement that Panama hats are worn under water is said to be incorrect.

To have the children sound and healthy is the first care of a teacher. They cannot be healthy if troubled with worms. Use Mather's Worm Expeller.

Men Harassed to Plovers

Men harassed to plover are not an uncommon sight in Mexico, Mexico, because of the scarcity of beasts of burden.

France Needs Wheat

This Year's Crop is Insufficient for Annual Requirements

France's wheat crop of 1922 is more than one-fourth short of last year's production and nearly one-third under the customary annual requirements, according to statistics issued by the Ministry of Agriculture. The crop is also insufficient, but not by such a large margin, for the country's needs are more abundant than last year.

The wheat yield is estimated at 61,000,000 quintals, as compared with 83,000,000 last year and the country's normal requirements of 84,000,000. This is due to a reduction of 600,000 acres to the area planted, the small yield per acre and bad weather.

Preliminary purchases abroad already amount to 7,000,000 quintals. These were bought in Canada and the United States at less than the prices prevailing in Paris. For the last month, France has been buying on her old reserves because of the late harvest, so actually there is only eleven months to cover. It is estimated, therefore, that the shortage would have been only 24,000,000 quintals and as 7,000,000 were bought abroad, there remains needed 17,000,000 quintals.

But no difficulty is expressed as the wheat exporting countries such as Canada are believed to have a surplus of 30,000,000 quintals above the needs of Europe, where the average shortage is 15 per cent.

If You Have Neuralgia Rub On "Nervine"

Apply Nervine to the sore spot. Notice the warm glow that spreads deeper and deeper. As Nervine's soothing influence is carried deep into the sore tissue. How quickly the pain is eased. In a little while you have forgotten it, the soreness has actually gone. For Neuralgia, Sciatica, Rheumatism, Nervine is a boon. Large 25¢ bottles. Sold everywhere.

Serving One's Fellow Men

New York Lawyer Building Apartment Houses for Moderate Rental

It is easy to hear people say that there is nothing very bright in the world's skies. But the hopeful watcher will find some hours of promise—no "rainbow" nor "moon beams." Months ago Samuel Untermyer, the distinguished New York lawyer, declared that he would work for the construction of five-story modern tenements to house 45,000 families at a rental of 25¢ to 35¢ a room. To New Yorkers familiar with building costs, this seemed absurd. But the other day ground was broken for fifty such apartment houses, planned to house 2,000 families, and it is predicted that the rent Mr. Untermyer proposed will not be exceeded.

The bow of promise is not these new houses, but the fact that is demonstrated that the need of the community, rather than the highest order with the object, not of becoming wealthy, but of serving one's times and one's fellow men.—From the Milwaukee Journal.

India Trip Changed Prince of Wales

London Report Says Tour Transformed Him Into "Early Middle Age"

What has the Indian tour done to the Prince of Wales?

Has it destroyed his youth?

These are the questions that all London now asks. Everyone who sees the change in the Prince since his return from his adventurous tour, and the general inquiry is whether it was worth while, after all.

From a fresh-colored, smiling eager boy the Prince has seemed to be a man of early middle age. All of the old light-heartedness seems to have deserted him and, wherever he appears, he looks weighed down by care.

And there is a curious apprehensive watchful glance in his eyes that none of his friends like. Talking to a friend, his glance is always ahead. It is not fear, but a kind of subconscious watchfulness. He seems like a man never released from an unending strain.

But, perhaps a happy marriage may bring back the old ease and gaiety. But at present the young Prince looks like a man who has survived a terrible ordeal.

Where Learning is Valued It is the least of the Winnipeg Board of Trade that there are more University students in Manitoba, in proportion to population, than in any other province of Quebec, or any state in the United States.

The number of places selling International League in London has been steadily decreasing during the past ten years.

Replenishing Forests

Benedictine Monks Plant Tree For Each One Cut

Benedictine monks for 910 years have been cultivating one of the world's finest forests. It surrounds an ancient hermitage, about fifty miles southeast of Florence, Italy. A report in an American forestry magazine says that this forest is as fine as it was nearly 1,000 years ago, though lumber has been taken out of it in great quantities. The monks plant new trees as fast as they cut down old ones. Our forests are rapidly disappearing. Unless we want a treeless America we, too, will have to plant a tree for each one logged. Forest destruction is our greatest waste.—Aurora Beacon-News.

Purifying of Silver

Crude silver is purified by contact with mercury, followed by distilling of the mercury, by which means the refined silver is left behind.

Some people mind their own business only when they have nothing else to do.

Speeding the Typist

Considerable interest may be aroused in a typewriter recently invented which provides twenty-two keys not found on the standard machines. These keys print, with appropriate spacing, entire words, such as "we," "are," "was," "and," "the," etc., the claim being made that by the use of these improvements the typist can make remarkably increased speed. An interesting feature of the inventor's claims is the calculation that these twenty-two mono-syllables constitute 21.8 per cent. of the language in ordinary daily use.—Christian Science Monitor.

It "melts in your mouth" and the gum in the center remains to aid digestion, brighten teeth and soothe mouth and throat.

There are the other WRIGLEY friends to choose from, too:

Both Turks And Greeks Are Still In Defiant Mood

Constantinople.—The question of the evacuation of Thrace was the cause of the rupture in the Mudania conference. The attitude of the Turks and Greeks was very belligerent, threatening the success of the conference.

Janet Pasha, in a fiery mood, upset the conference. He declared that the Turkish army must enter Thrace immediately, and his tone was determined and defiant.

General Harrington attempted to reason with him after the fashion which had proved so effective in dealing with minor preliminaries, but Janet was adamant.

Janet's position was completely at variance with the terms of the Allied note, which is the basis of the negotiations. General Harrington explained, partly to the Turkish leader and partly to the Allied associates.

General Mombelli endorsed and supported the British general's statements, when suddenly a new bombshell was thrown into the gathering by General Charpy, the French representative, who announced abruptly that he had been instructed by his Government to support the Turkish demands.

General Charpy was followed by M. Franklin-Bouillon, the special French envoy, who similarly supported the Turkish position, explaining with some rhetorical effect that "France places a different interpretation on the terms of the Allied note than her conference."

It was evident that the Allied camp was divided against itself, and that the situation had become untenable.

There was another interesting side to the conference. The Greek delegates also had spoken, and they brought no palm of peace, they threw down the gauntlet of defiance, declaring that the Greek army was ready and willing to fight for Thrace intent on saving the honor of Greece.

Greenfield Ship Lost

St. Johns, Nfld.—The Greenfield Mission steamer Balthazara, which has completed twenty years of service along the coast of Labrador, sank recently a few miles off Cabot Island. The crew of six was saved.

Prince Rupert, B.C.—The American fishing vessel Balthazara has been turned off Cape Mueson, Alaska. Captain Harry Selig and the crew of the vessel rowed 14 miles to a loggers' camp after leaving their ship.

Sir Henry Thornton Appointed New Head Of Canadian National Road

Ottawa.—Major-Gen. Sir Henry Worth Thornton, K.B., general manager of the Great Eastern Railway of England, is the new head of the Canadian National Railways. An order-in-council, appointing him and other members of the board, and formally consolidating the Canadian Northern and Grand Trunk lines into the Canadian National Railway System, passed the Cabinet Council and was approved by the acting Governor-General.

Sir Henry was in Ottawa when final arrangements for his appointment were made. He will return almost at once to England to settle up his affairs there, returning to Canada to take over the direction of the National System within about a month.

In introducing Sir Henry to the newspapers, Premier King pointed out that the act provided that members of the board must not be shareholders in, or connected with companies in any way dealing with the railways in question or selling them supplies. This had been observed, said the Prime Minister, both in regard to

McGill Honors Memory Of Colonel McCrae

Montreal.—An imposing ceremony took place at McGill University, when a memorial in the form of a stained glass window of three lights, to the memory of three of the teaching staff of the faculty of medicine who were killed in the Great War, was unveiled in the medical building. The window is dedicated to Lieut.-Col. John McCrae, Canadian author of the poem, "In Flanders Fields," to Lieut.-Col. R. P. Campbell and to Lieut.-Col. H. A. Yates. General Sir Arthur Currie, principal of McGill University, performed the unveiling, while the dedication address was given by Rev. Canon Almond, former chaplain of the Canadian corps.

Husband And Wife Nearly Dead With CHOLERA

The chief symptoms of cholera are vomiting, and purging occur either simultaneously or alternately, and are usually sudden and very violent, and the matter ejected from the stomach has a bilious appearance and a nasty bitter taste.

On the first symptoms appearing, Dr. Fowler's Extract of Wild Strawberry should be taken, and the trouble checked before it becomes serious. Isaac Smith, Campbell, N.B., writes: "We have been using Dr. Fowler's Extract of Wild Strawberry for cholera. My husband and I were pretty nearly dead with it until we started to use your medicine, and thanks to it, we have found great relief, and are recommending it to all our friends."

"Dr. Fowler's" reputation stands behind "Dr. Fowler's," therefore you are not experimenting with some new and untried remedy when you get it. Price, 50c bottle, put up only by The T. Milburn Co., Limited, Toronto, Ont.

Turks Withdrawing

London.—A special dispatch from Ankara says that orders have been issued to the Turkish military commanders to evacuate the neutral zones in Asia Minor immediately. The Turkish cavalry has already begun to withdraw from the Dardanelles section.

BANDITS ADD MURDER TO LIST OF CRIMES

MAKE GETAWAY AFTER RUNNING GUN FIGHT WITH POLICE PATROL

Regina.—Bandits operating in Southern Saskatchewan added murder and two robberies to the long list of crimes now placed to their credit, when Paul Mattor, an employee of the Regina Wine and Spirits Company, was shot and instantly killed in the C.P.R. station at Blenheim.

While his companions covered him the menace of threatening guns, \$5,000 in cash was removed from the pockets of the dead man. The murderers fled eastward in a big Cadillac car. On the road between Hirsch and Frohisher they overtook and passed the police patrol car. While the cars passed, shots were raised on the bandits from rifles and revolvers carried by the police patrol, and the running gun fight was continued until the robbers were out of range.

Within a short time the same crew is believed to have held up and robbed a rum running truck at Roche Perce, on the international boundary. It is the same liquor, it is claimed, for which Mattor was accepting payment when killed.

MAY ADOPT POSTAL AREAS

PLAN FOR DIVISION OF CANADIAN CITIES INTO ZONES TO EXPEDITE SERVICE

Ottawa.—Plans for the division of the larger Canadian cities into postal areas, following the system in vogue in the larger European cities, were submitted at the closing sitting of the conference of Dominion postal officials.

E. J. Underwood, chief of the post office division, postal service branch, Ottawa, who submitted the scheme, argued that by the adoption of postal areas, delivery of mail would be expedited.

Postal officials from Calgary, Vancouver, Winnipeg, London and Hamilton did not think division of their cities into postal areas could be undertaken with advantage at the present time.

In the western cities, particularly where development was rapid, it was argued, maps would be quickly out of date and have to be revised.

"Cascarets" 10c

For Sluggish Liver or Constipated Bowels

Clean your bowels! Feel fine! When you feel sick, dizzy, upset, when your head is in a whirl, or your stomach is sour or gassy, just take one or two Cascarets to relieve constipation. No griping, no griping laxative-cathartic on earth for grown-ups and children. 10c a box. Taste like candy.

SITUATION IN INDIA IS BECOMING SERIOUS

AUTHORITIES ANXIOUS OVER SPREAD OF ANTI-BRITISH PROPAGANDA

London.—The Daily News of Allahabad, India, according to a Reuter dispatch, states that the daily reports from the Punjab show that the Akali agitation is rapidly developing into a genuine revolutionary movement. The gravity of the situation was recently increased by secretive broadcast propaganda throughout India, including the India regions.

Although heretofore no call has openly been made on the Akali soldiers, a most undesirable impression has been made on them and this is the cause of much anxiety to the authorities.

The implacable attitude of the Indian Moslems, led on by Hindu extremists and a venomous Anti-British press, is adding to the seriousness of the situation.

The Allahabad Daily News says it understands that the All-India Central Khilafat Committee is advising the Governments of Angola, Camptupile, Iraq, Egypt, Persia and Afghanistan and other Moslem countries to send delegates to a Khilafat conference at Gaza, Bengal, in December.

Will Ask Preference For Dominion Fruits

Delegation of Growers From Australia Going to England

London.—A Reuter dispatch from Sydney, Australia, says it is understood a delegation of fruit growers, accompanied possibly by Premier Lawson, of the State of Victoria, will proceed to England about the end of this month to plead for a preference in the British market for dried and canned fruits from the Dominions.

Bar Women From Pulpit

Will Not Be Permitted to Become Pastors of Methodist Churches

Toronto.—Once again the women have lost out in their efforts to gain admittance to the Methodist ministry. By a vote of 17 to 16, the discipline committee of the general conference decided against recommending their admission to the pulpits of the Methodist Church.

There were three women on the committee, and they put up a vigorous fight to allow the women to become pastors.

One of the arguments against women becoming ministers advanced before the committee was that it would tend to "rob the cradle."

A Divorce Granted

After many years of patient suffering, you can be divorced from corns, you can get rid of them completely by applying Putnam's Corn Extract. This wonderful oil remedy acts in 24 hours and never fails. Refuse a substitute and remember Putnam's is the only Fail-safe remedy. 25c every where.

Disastrous Floods In Bengal

Thousands Are Reported Drowned In Affected Area

London.—A terrible loss of life has been taken by the recent flood in Bengal, says a Reuter cable from Calcutta.

It is impossible to estimate the extent of the disaster at present, but from the fact that an important junction point was for days inundated by five to ten feet of water while crowded with refugees from surrounding villages, which had been completely destroyed, it seems probable that in the whole affected area several thousand people have been drowned.

An outbreak of cholera is adding to the difficulties of the situation.

Find Lost Document

London.—The Athens correspondent of the Times says that Constantine's act of abdication has been found in the possession of his aide, Col. Nico, aide. It will be published immediately.

Give your local merchants a chance. Buy at home.

Destructive Forest Fires Cause Immense Loss In Northern Ontario

THRACE HANDED OVER TO TURKEY

SUCCESSFUL ISSUE OF CONFERENCE IS LOOKED FOR

London.—The Allies have agreed to return Thrace to the Turkish army in 30 days.

News received that M. Franklin-Bouillon, the French envoy, and Hamid Bey, the Nationalist representative, has decided to return to Constantinople from Mudania immediately, strengthened the hope of the successful issue of the conference.

The delegates agreed to establish a definite line of demarcation between the British and Kemalist forces in the Chankay zone. The space between the opposing forces will be sufficient to place them out of rifle shot, thus lessening the danger of immediate conflict.

A message from Athens says that the Greek Government has ordered general mobilization of the classes of 1917 and 1918. It has also cancelled all leave.

Chinese Students Receive Ultimatum

Victoria School Board Gives Scholars Chance to Return

Victoria, B.C.—Following the conference between the school board and the Chinese on the deadlock that has kept Chinese children out of school for some weeks, the board issued an ultimatum.

Unless the striking Chinese pupils return to school at once, the board will close all schools for Chinese in the public school system, and opportunities for registration will not be afforded until January, after the Christmas vacation.

Killed When Car Overturned

Royal Insurance Superintendent Meets Death Near Portage la Prairie

Portage la Prairie, Man.—W. Watts, of Montreal, superintendent of agencies for the Royal Insurance Company, was killed near Portage la Prairie, when a motor car in which he was riding was forced from the road by another car and overturned in a six-foot ditch. Major G. K. Killian, of Winnipeg, driver of the car, and W. W. Watson, of Winnipeg, another passenger, were painfully injured.

Will Honor Canadian Club

London.—The Prince of Wales has consented to be the guest of the Canadian Club of Great Britain at a luncheon to be given at Stratford Place on Nov. 10. The members are delighted at the honor conferred upon their young club, which in a short time has more than justified its existence.

Toronto.—Halleybury, North Cobalt and several smaller places north of these points have been wiped out by forest fires, which have reached great proportions. Great destruction has been caused throughout the entire country, according to advices received from Cobalt.

It is understood that Heselt and Elk Lake, two small mining towns, are among the places destroyed by the flames.

As far as can be learned by telegraph and telephone communication with points within reach of the fire zone, the fires sprang up in the bush within a radius of 60 miles, between Cobalt and Danc, which is 160 miles north of North Bay, and were joined by a strong wind at a point half way between these two points. Within the territory threatened with extinction are the thriving towns of Cobalt, Halleybury, Englehart, New Liskeard, Charlton, Upp Park, Earlton Junction and Elk Lake.

Halleybury has a population of about 4,000; New Liskeard has about 2,000; Englehart about 1,500; and Elk Lake about 1,000. These populations, with those of the smaller districts affected, are estimated to comprise a total of 25,000 persons. It is estimated that there is a population of 75,000 north of North Bay.

Over 5,000 people have been rendered homeless. The loss of life is considerable and the property loss will obviously run into many millions of dollars.

Cobalt, Ont.—Thirty-three people are now known to be dead as a result of the most devastating fires in the history of the Northern Ontario district, which swept an area along the line of the Temiskaming and Northern Ontario Railway bounded by Englehart on the north, and a point just outside Cobalt on the south, a distance of approximately 35 miles.

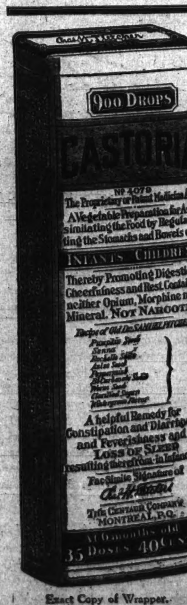

In addition to the known dead, a great number of people in the fire-ravaged districts are reported missing, but it will be some days before an estimate can be made with any degree of accuracy. It is thought possible that 50 persons have met death either from burns, suffocation or drowning.

Heavy rains have resulted in the fires being extinguished practically all over the stricken country, and people are growing calmer and beginning to take stock of the tremendous damage. Conservative estimates place the property loss at between four and five millions of dollars.

Western Students Awarded Degrees

Kingston, Ont.—Degrees announced at Queen's University include the following:

Degree of B.A., Robert Nichol Anderson, Saskatoon; Barbara Robins Morrison, Regina, Sask.; Claude Hill Robinson, Camrose, Alta.; Lloyd Fleming Smith, Moose Jaw, Sask. Degree of B. Com., Clarence Laverne Yoerger, Humboldt, Sask.

Children Cry For Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be abandoned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food. A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your ailing child anything but a medicine especially prepared for infants and children? Don't be deceived.

Make a mental note of this: It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

THE FORDNEY TARIFF AFFECTS WESTERN CANADA

Western Canada producers will be interested in some of the provisions of the new United States tariff. This high wall tariff is certainly exclusive and to a large extent will affect Western Canada trade in a detrimental way. A glance through the tariff leaves the impression that it was framed with the idea of shutting out Western Canada products. The following quotations will show the position under the old tariff and the increase under the new one:

Dairy Products. Butter, oleomargarine, etc. increased from 2 1/2 to 3 cents per pound; cheese from 20 to 25 cents per pound; milk free under old tariff, now 2 1/2 cents per gallon; cream, free to 20 cents per gallon; milk condensed or evaporated free to 1 to 1 1/2 cents per pound.

Cattle—Weighing less than 1000 lbs. free under old tariff, now 1 1/2 cents per pound; weighing over 1000 lbs. free, now 2 1/2 cents per pound.

Sheep—Formerly free, now \$2.00 per head.

Wool—Formerly free, now 11 cents to 31 cents per pound.

Grains—Wheat formerly free, now 40 cents per bushel; wheat flour, from 70 to 75 cents per 100 lbs. floured; oatmeal from 25 cents to 35 cents per bushel; barley from 15 cents to 20 cents per bushel; oats from 5 cents to 15 cents per bushel; oatmeal and rolled oats from 30 cents to 50 cents per 100 lbs.; rye, free, to 15 cents per bushel; bran, shorts, etc. from 10 per cent of free to 15 per cent ad val.; all classes grass seeds, from free to 1 cent to 4 cents per pound.

Legs—Pigs, spruce, cedar, hemlock, formerly free, now \$1.00 per 1000 feet; manufacturers of wood, increased from 15 per cent to 25 to 35 per cent.

Pigs—Formerly free, now 1/2 cent per pound; bacon, hams, etc. free, to 2 cents per pound; lard, free to 1 cent per pound; land substitutes free to 4 cents per pound.

Poultry—Live, increased from 1 cent to 3 cents per pound; dressed from 2 cents to 6 cents per pound; eggs free to 8 cents per dozen.

Horses—Value under \$150 each, from 10 per cent ad val. to 30 per head; value over \$150 each, from 10 to 20 per cent.

Hay—Increased from \$2 to \$4 per ton.

Potatoes—Increased from 25 cents per bushel to 50 cents per 100 lbs. Undressed furs, free; hides, free; brick, formerly 10 per cent, now free. Vegetables in natural state, from 15 to 25 per cent.

Meats, preserved or prepared, free to 20 per cent.

PRINTING BY WIRELESS

A penniless engineer has invented a device for printing by means of wireless.

He is a Hungarian named Szabo, and his process is quite a simple one. The "copy" to be printed is set up in columns in the sending apparatus, and the wireless waves convey a similar impression to the receiver. The impression can also be sent by electricity along ordinary telegraph wires.

The inventor gave a lecture to a party of scientists in the workshop where he is living—for he is entirely without means.

He claims that his machine will enable newspapers to be printed at the same moment all over the world without making use of the post or telegraph.

THE RED CROSS

For the second successive year a Junior Membership Campaign will be held in connection with the Red Cross Drive, which is to take place this year from November 5 to 11. In June, 1935, the Junior Red Cross decided to wage a campaign for membership in order to raise sufficient funds to open a hospital for unfortunate children of the province—those whose parents were not in a position to give them the treatment they needed.

At that time 13,500 junior members were enrolled in the province and in May of this year the Junior Red Cross Hospital was opened in Calgary. This year an objective of 40,000 junior members has been set and if this number is enrolled it will be possible to operate this institution at full capacity for another year. Each child who joins the Red Cross will only have to pay a fee of 25 cents and every cent raised will go to the upkeep of the Hospital. None of this money will be taken for administration or other expenses.

The hospital has room to accommodate 35 patients at one time and it has been filled to capacity almost every day since it was opened. This is the only children's hospital in Canada which is supported altogether by children.

Every few days a patient comes out and returns to its parents cured and a new one comes in to take its place.

It must not be forgotten that the parents of the children who are given treatment at this hospital are unable to pay for it, and so the junior members are doing a work which otherwise would be left undone.

All children who are at present members of the Junior organization are asked to bring in at least two more members during the membership campaign.

WEAR A POPPY ARMISTICE DAY

"Poppy" Day will be held in Canada as well as in all the Allied countries on Armistice Day, November 11. The campaign in Alberta will be conducted by the Provincial Command of the Alberta Great War Veterans Association, and the actual selling will be in the hands of the various locals throughout the province.

In this connection it is stated that there are a number of districts in Alberta where the veterans are not organized, and in such instances any other organization willing to conduct the campaign there is requested to communicate with R. Gallacher, the Provincial Secretary, 207-8 Oddfellows' Block, Calgary. It is hoped to have the province so organized that citizens in every district will have an opportunity to secure a poppy and wear it on Armistice Day.

The flowers will be sold during the entire week preceding Armistice Day. The entire proceeds from funds raised will be used to relieve distress among disabled returned men and every citizen is urged to wear a poppy in honor of the men who fought so bravely during the Great War and in memory of those who he amid the crosses.

WHAT CAUSES GAS ON THE STOMACH?

It is caused by fermenting, sour waste matter in the intestines. This old, foul matter should be thoroughly cleaned out with simple buckthorn bark, glycerine, etc., as mixed in Adler-i-ka. This acts on BOTH upper and lower bowel, removing old accumulated matter you never thought was in your system. Adler-i-ka relieves ANY CASE of gas on the stomach. EXCELLENT for sour stomach and chronic constipation. Guards against appendicitis. BLAIRMORE PHARMACY.

Peace Dollar Coined By U. S.

Made in Commemoration of Arms Conference at Washington

The new United States silver dollar is now in circulation, several hundred thousand having been shipped to the Federal Reserve Bank by the Philadelphia Mint.

The new coin was made in commemoration of the arms conference at Washington. It is designed with the head of Liberty on one side, and on the other a dove upon a mountain top, clutching an olive branch, struck by the rays of the sun, with the word "peace" beneath it.

This is the first time the silver dollar has been changed since 1878. The coinage laws forbid any change in the design more often than once in 25 years, except by special legislation.

There will be 150,000,000 of the new coins issued, one-half of which will be dated 1921. The first dollar was sent by special messenger to President Harding.

Shanghai to Have Wireless Station

Will Open Radio Communication Between China and America

Commercial interests of Shanghai and of China generally are looking forward hopefully to the opening of radio communication between Shanghai and America to be brought about by the erection in Shanghai in the next two years of a wireless station which it is said will be second to none in the world. The building of this station and a general radio system for the interior of China is to be carried out by an American concern, the Federal Telegraph Company, under agreements lately concluded at Washington between the United States and China.

According to plans announced in Shanghai the station to be erected here will have six towers each 1,000 feet in height, and will have mechanical equipment equal in power to the great radio station at Bordeaux, France. The system that is to give wireless communication through the interior of China will include stations to be built at Hankow, Peking and Canton. R. R. Deal, who is engineer in chief of the company is in China carrying forward work for preparation for the erection of the various stations.

The Father Of Shipping

Romantic Stories of Lloyd's, London's Great Insurance Agency

From the London coffee house keeper, Lloyd's, the headquarters of the world's shipping insurance derives its name.

Towards the end of the seventeenth century those interested in shipping matters were accustomed to meet at a small coffee house in Tower Street. This was kept by a man named Edward Lloyd, who subsequently removed to the corner of Abchurch Lane and Lombard Street, says the Times.

In 1696 Lloyd started a newspaper, which gave a list of ships' arrivals and sailings. The newspaper which he called "Lloyd's List" succeeded until his founder published an article questioning a decision in the House of Lords.

Edward Lloyd was censured and his paper was suppressed. It was not until thirty-five years later that he was allowed to re-establish it. Since then "Lloyd's List" has appeared regularly.

The frequenters of Lloyd's coffee house were not permitted to enjoy their monopoly of marine insurance for long, and in 1720 Parliament allowed two other companies to be established in London.

About one hundred years later there was a parliamentary inquiry into the monopoly enjoyed by Lloyd's and these two companies. The House of Commons decided that Lloyd's had rendered such great service to the country by supplying the government with information regarding maritime matters that it should retain its privileges.

Ten years later, however, an act was passed by which marine insurance was thrown open, and since that date many other companies have been established.

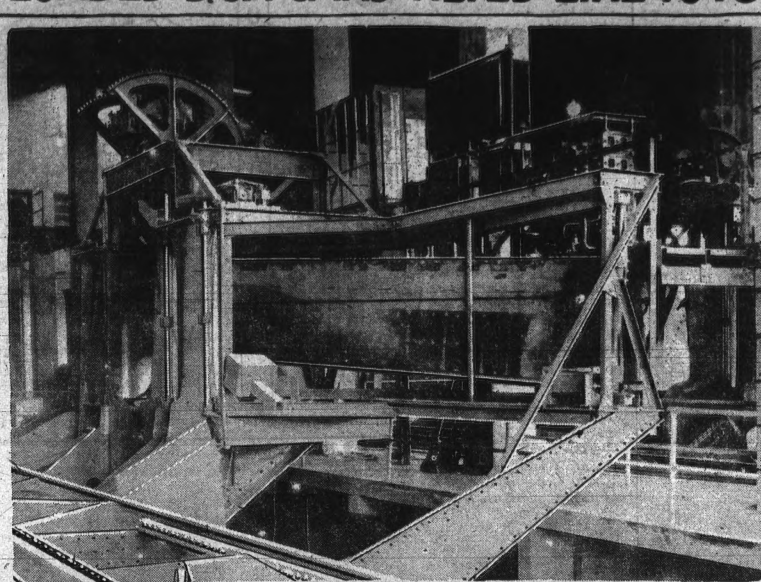

All candidates for membership at Lloyd's have to deposit such security for their liabilities as may be required. This security at the present time amounts to over £2,000,000.

There is a Lloyd's agent in every port in the world who transmits news of all ships that pass. At Lloyd's the "Captains' Register" is maintained, which gives the record of every master-mariner, and there is also an inquiry office.

Habits, though in their commencement like the flimsy link of a spider, trembling at every breeze, may, in the end, prove as links of tempered steel, binding a deathless being to unknown felicity or woe.

LOADED BOX CARS TILTED LIKE TOYS

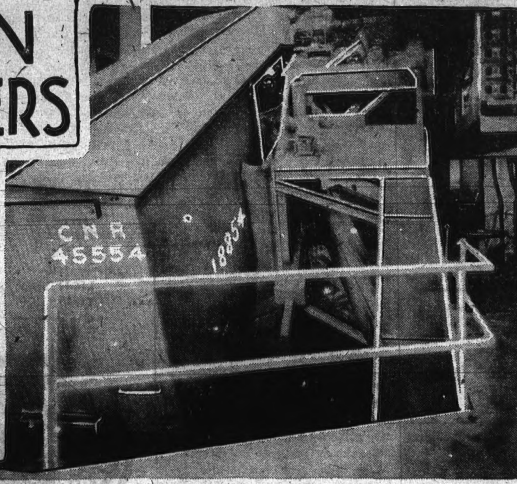

GRAIN UNLOADERS

CANADIAN
NATIONAL
RAILWAYS
ELEVATOR

PORT ARTHUR

THE LARGEST
GRAIN HANDLING
PLANT IN THE WORLD

In any country where the natural resources of the soil, forests, mines and fisheries are distributed fairly evenly, agriculture is usually the chief primary industry, and those based upon the utilization of the natural resources, completing the structure.

Canada is an agricultural country. We grow much more than we consume, and we export a great deal of the surplus—especially grain. As a consequence, the cereal crop is of importance in Canadian property, and a great deal of thought and energy and money have been expended upon the methods and facilities utilized in getting the product from the fields to the markets overseas.

In Canada, in the plans worked out for the handling of western grain, the terminal elevators at Port Arthur and Fort William occupy a position of great strategic importance. The farmer threshes his grain in his field and markets it, often immediately, to country elevators, which stretch in a great chain throughout the entire Canadian west. From these elevators the grain is loaded into box cars and transported by the railways to points where the inspection by government officers is made, and from those points to the terminal elevators where as long as export demand continues and navigation on the lakes is open the transshipment to vessels is effected. During the season of lake and river navigation in this country this transfer, from box car to ships, takes place at Port William and Port Arthur, with the great terminal elevators there, the medium of its accomplishment. The railways have concentrated upon their part of the problem. They provide motive power and grain cars in ever increasing numbers with yards and engine houses in proportion and make careful plans in advance with constant endeavor to see that nothing obstructs the movement of the grain to the great elevators at the head of the lakes.

The total capacity of these grain

handling plants at the twin cities on Lake Superior, is in excess of 50 million bushels, and the largest among them is that of Canadian National Railways. Most of the operations within these elevators are almost automatic in character, and the cereals are handled in great quantities, at high speed, once they have actually been passed into the institution. A weak link in the chain of marketing has always been in transfer from the box car into the elevator. It seems odd that, with all the improvement, during the last twenty years in actual railway and elevator practice, this feature of grain marketing should have remained so little changed. This was not a consequence of neglect, for many able minds had been at work to speed up this operation, but no device quite suitable was evolved. When the Canadian National Railways elevator was being re-constructed at Port Arthur, a year or so ago, this factor was the cause of considerable consideration.

A faster unloading device was sought, and finally one was designed, constructed and four units installed. The Canadian National elevator is the largest grain-handling plant in the world, it having a capacity of almost 10 million bushels, and the operation of the new device—the first installation probably anywhere—is being followed with keen interest. The accompanying photographs will furnish a fairly adequate idea of its operation. Before adopting the new automatic box car unloader, the Canadian National Railways elevator, in common with all others receiving grain from box cars, was equipped with a power shovel—a large wooden affair, connected by a cable to a power-driven revolving shaft. The operator carried the shovel over the grain to the farthest point in the car, forced it into the grain when it is drawn to the door and to the pits by machine power. The man handling the shovel re-

peats his operation again and again. Usually two shovels, and sometimes three, are utilized to a car, but for the unloading of an average grain car of its contents. And apart from that, the men operating the shovels are constantly enveloped in a cloud of dust, while undergoing heavy, physical exertion.

The automatic box car unloader has revolutionized this operation at the Canadian National elevator. The device adopted consists of a tilting platform, with automatic mechanism for the opening of the grain door, and for the introduction of deflecting baffles into the car to cause the grain to flow properly by gravity.

A car from the tracks where the "loads" are kept is moved to the tilting table. In 40 seconds the end bumpers are raised and the car centered. Ten seconds are required for the drawing of end pins, and 15 seconds more for the opening and raising of the car door. With this last operation 10 per cent. of the grain is discharged into the elevator pit. The tilting table, with the cars securely fastened there, is tilted 20 degrees, and 35 per cent. of the grain content pours by gravity into the receiving pit; this requiring 20 seconds. Next, the right "baffle" is inserted and the table tipped 45 degrees to the right, with the result that 35 per cent. of the grain remaining pours through the door, the operation requiring 40 seconds. The right "baffle" is then withdrawn, and the left inserted. The table is tilted 45 degrees, which completely empties the car. This last operation involves 20 seconds. The left "baffle" is then withdrawn and the car levelled, in 10 seconds; the door breaker is withdrawn in 12 seconds; the end pins are inserted in 10 seconds; and the end bumpers dropped and the interior of car inspected, in 30 seconds more. The complete operation, therefore, requires 237 seconds,

or approximately 4 minutes. The empty car is removed from the three, are utilized to a car, but for the unloading of an average grain car of its contents. And apart from that, the men operating the shovels are constantly enveloped in a cloud of dust, while undergoing heavy, physical exertion.

The automatic box car unloader has revolutionized this operation at the Canadian National elevator. The device adopted consists of a tilting platform, with automatic mechanism for the opening of the grain door, and for the introduction of deflecting baffles into the car to cause the grain to flow properly by gravity. A car from the tracks where the "loads" are kept is moved to the tilting table. In 40 seconds the end bumpers are raised and the car centered. Ten seconds are required for the drawing of end pins, and 15 seconds more for the opening and raising of the car door. With this last operation 10 per cent. of the grain is discharged into the elevator pit. or approximately 4 minutes. The empty car is removed from the three, are utilized to a car, but for the unloading of an average grain car of its contents. And apart from that, the men operating the shovels are constantly enveloped in a cloud of dust, while undergoing heavy, physical exertion.

Conveyor belts and roller legs serving the unloaders have a capacity of 20,000 bushels of grain per hour. The scales are specially designed for the weighing the 2,000 bushel capacity scale hopper having a 25-inch diameter outlet valve at the bottom.

Distribution of grain from the scale controlled by a turnhead operated from the scale floor. Separate spouts are provided direct from each scale turnhead to a shipping bin, car loading spout, storage conveyor belt, transfer belt, and to a Mayo spout serving a number of workhouse bins. This rapid system of distribution not only permits economy of operation, but is necessary to permit distribution of the grain as rapidly as it is delivered from the car unloaders.

The cleaning capacity of the elevator is adequate to serve its receiving capacity. Grain is shipped to boats on five roller legs with a total average capacity of 75,000 bushels per hour. The elevator is of reinforced concrete construction throughout except the storage annexes, which are of tile construction. The elevator is electrically driven, with a separate motor for each machine. Its vacuum cleaning system is as complete as can be devised, and unusual precautions are taken to prevent dust explosions.

Poultry World Hall Of Fame

White Wyandotte Hen Had a Remarkable Record

A short time ago the death of White Wyandotte hen No. B-162 occurred. Since this hen has had so much to do with the present high production of White Wyandottes now kept at this station, her name deserves a place in "the hall of fame" of the poultry world, and her achievement told in story, says a report from the Dominion Experimental Station at Sidney, N.C.

No. B-162 was hatched May 1st, 1917, and laid her first egg October 20th, 1917, being 182 days old. Her total record was: 1st year, 257 eggs; 2nd year, 163 eggs; 3rd year, 107 eggs, 4th year, 4 eggs, making a total of 531 eggs. Of these 55 were laid in the winter of the second, 13 during the winter of the third, and 4 during the fourth. At time of laying her first egg, her body weight was 5 1/2 pounds. Her eggs averaged 25 ounces to the dozen.

That her pullets inherited her high producing qualities was evidenced by their production: In 1919, twelve of her pullets gave an average of 223 eggs, the individual production being from 174 to 239 eggs. Of two pullets hatched in 1920, one gave 205 eggs and one gave 243 eggs, with two months to complete her year. The second year averages for her pullets were also good, but as yet are not complete.

B-162 was never broody. She was attending so strictly to her business of egg production, that she had no time. It would seem that this character was also transmitted, for only three of her daughters have ever lost time because of broodiness.

Much has been said and written concerning the importance of the male in the flock from the standpoint of high production. He does occupy an important position, and we are becoming more convinced with the years that if we are to obtain high production, and to hold it, that the trait must be in the blood of the dam as well as in that of the sire.

Mounted Police Take Long Trail

Will Investigate Reports of Cannibalism Among Indians in North

To discover whether the cannibal-eater tribes of Indians have resorted to cannibalism, is giving a member of the Royal Canadian Mounted Police force a long and dangerous journey into the barren lands north of Lake Athabasca, and a party is now leaving Fort Fitzgerald to investigate the matter.

Reports which reached the northern detachment of Canada's frontier force last summer stated that the caribou-eating Indians who hunt in the barren lands had missed the annual migration of the caribou herds from the shores of the Arctic and were in consequence starving; and, furthermore, they had killed some members of the tribe and had resorted to cannibalism.

The personnel of the party consists of one constable of the R.C.M.P., an Indian guide and two dog team drivers, with two teams of huskies. The party will penetrate the barrens for a distance of approximately 400 miles northeast of Fort Fitzgerald and will be absent for two months. The country is a howling wilderness; no food can be obtained, and the party must carry with them sufficient food for the entire trip.

If there be any reason to suspect that crimes have been committed the constables will return to civilization with his prisoners. It is impossible to reach the country during the open season.

BY-LAW NO. 77

Governing and Supervising Public Dance Halls and Public Dances.

WHEREAS it is expedient to provide for the regulation, governing and supervising of public dance halls, and

THEREFORE the Mayor and Council of the Town of Blairmore enact as follows:

1. That this By-Law shall be known as the Dance Hall By-Law.

2. Interpretation. In this By-Law unless the context otherwise requires: (a) The term "dance hall" means any public place, hired or leased with or without remuneration to the public for the purpose of dancing.

(b) The term "public dance" means any dance carried on in a public dance hall where a charge is made for entry or a collection taken in connection with such "dance."

(c) The term "proprietor" of a dance hall means any occupant or person in possession of any premises within the Town of Blairmore, who allows his building to be used for public dances.

(d) The term "manager" means any person regulating, governing and supervising or apparently in charge of the dance within the meaning of this By-Law.

(e) The term "license" means a fee of \$5.00 to be paid by the proprietor or manager for the operating of any dance at any time within the Town of Blairmore, in the Province of Alberta.

(f) The term "guardian" means any desirable person over the age of 18 years.

3. Regulations and Duties of Licensee.—Every person licensed under this By-Law shall be bound to observe and about the premises in and upon which he carries on the dance in respect of what he is to be a licensee, and all premises to which any license applies as aforesaid shall be liable to be inspected by the Chief of Police of the Town, or any policeman or constable thereof authorized in that behalf, and any person who shall refuse admission of such officer or person after demand shall be guilty of a breach of this By-Law.

4. No license under this By-Law shall permit any person under 18 years of age, unless accompanied by his or her father or mother, or guardian, to enter or remain in any dance hall, provided that this restriction does not apply to a dancing school during the time lessons in dancing are in progress.

(5) A register shall be kept at each dance hall, in which the licensee shall cause or require each person under 18 years of age who enters or is found within any such premises, to enter his or her name and address, as well as the name and address of the attendant or parents, as the case may be.

6. It shall be unlawful for any

person to make any misrepresentation or false statement as to the age of himself or herself, or any other person for the purpose of obtaining admission of such person to a dance hall or to a public dance, or to be a parent of any other person in order that such person may obtain admission to such dance hall, or to be permitted to remain therein in violation of this By-Law.

7. No person shall act in a rude, boisterous or indecent manner, or use any insulting or profane language in any premises licensed hereunder, nor shall any licensee permit any person to act or talk in such manner.

8. No licensee of a public dance shall permit any intoxicated person or any prostitute or person of known immoral character to be or remain on the premises, and no person of such description shall enter or be in any public dance.

9. No dance of an immoral or indecent character shall be permitted in any public dance.

10. The Chief of Police of the Town and any police officer or constable designated to him, may at any time while a dance is in progress, at any other time, inspect any dance hall or licensed premises, and it shall be his duty upon request of the Mayor or any Councillor of the Town, to make or cause to be made such inspection, and to notify the licensee or person in charge of any breach of this By-Law, and to report same to the Mayor and Council of the Town.

11. No dancing shall be carried on or permitted in any licensed premises at any time after the hour of 12 o'clock on Saturday night until 9 o'clock on the Monday morning next following.

12. It is in the opinion of the Chief of Police or any Constable instructed by him that it is in the best interests of the public that the licensee of a dance hall having been warned and threatened with the revocation of his license by the Chief of Police or Constable shall have the power and authority to cause the closing of such dance hall.

13. Any person offending against any of the provisions of this By-Law shall be liable on summary conviction to a penalty not exceeding \$25.00 or costs or in default of payment thereof to imprisonment with or without hard labour for a period not exceeding one month.

14. A license to conduct a dance may be issued by the License Inspector of the Town on application in writing therefor, for so much inspection as may be required of good character, subject to the premises for which such license is sought, conforming to the provisions of this By-Law, provided that if the License Inspector refuses to issue such license by reason of bad reputation of any applicant, appeal may be taken to the Police and License Committee of the Town in the event of their refusal, if the Town Council, whose decision shall be final.

Done and passed in open court this 14th day of October, 1922.

about the ministers and residents of the town not putting a stop to it bootlegging in this district. I wish to remind you that during your residence in this town, you at no time lifted your hand or took any step whatsoever to counteract what you complain of in your paper. You seem to be hitting on the back and taking advantage of being absent from this district.

I remember having written a letter similar to this in August, 1922, when you were employed in the Blairmore Enterprise Office, and it would appear from your recent editorials that you are the one who wrote the letters to the different daily papers slandering the Crows' Nest Pass.

Citizens who have resided in Blairmore for the last ten years or more realize that in the early days law and order did not prevail such as it does today. This was on account of the different conditions prevailing then. Taking everything into consideration, with all the districts against the number of foreigners here, who was it brought them into Canada by the thousands? Such was the race for sudden wealth and opening up of the country that the people who were after the money were the cause of it. As you know, the countries of the continent of Europe as far as Constantinople were secured to get emigrants to work on our new industries, and they having taken advantage of such an endeavor as predicted by them, fulfilled their contracts. Since these thousands have taken up farming, gone into coal mines to work, started business for themselves, and made good; but now, just because a few of them have let loose, you condemn the Crows' Nest Pass district and the people therein as being lawless foreigners. You condemn the Town of Blairmore and the people therein as being "lawless foreigners."

What has the country done to make these people good citizens of Canada?

whereas you, whose business undoubtedly forced you and your family to live here for some time, can explain.

In a similar letter to this, in answer to slanderous correspondence to the daily papers, I stated, that if the correspondence would make himself known to the people of this district, I doubt the people would assist him in securing a better place in which to live. I take it from your editorial that if you were the correspondent, you evidently took the bait and in your opinion have found a better place in which to live.

You might be surprised to learn though it was mentioned in a former letter (which you no doubt read several times) that these same foreigners have tens of thousands of dollars in the banks or in War Bonds, real estate; money that they have earned working under conditions that either you nor I, nor the majority of would-be-reformers would care to work under.

Furthermore, the 192nd Battalion as raised in this district and 40 per cent. or more of its men were foreigners. These men went to fight for us. Did you? And perhaps you were protected by the same foreigners, were you not?

Your assertion that "the standard of morality of the foreign-born is lower than many of the best of the land" is undoubtedly the most undignified and all I will gainsay that an account were taken of the morality of these people it would be found that their standard of morality would be higher than a great many "no throw stones out of glass houses, because never in the history of this district has it ever been necessary to do a moral reform campaign, such as has been instituted in other places.

Your editorial at this time is most called for, as a man is being defamed and charged with the most serious offence known under our laws, and British justice should be dealt to him, and in the minds of the public; anyone who should be called to sit as a juror, should be left untampered and unbiased. But anybody reading our editorial and not knowing the conditions in this district would have a very hard time to remain unbiased, consequently a man could not receive a fair trial.

Your statement that Pick had made \$500,000, which we understand as being half a million, is also very unfair, and should be retracted, as I know that you have not the slightest idea how much money Pick has made, and a fact I do not believe that his own bankers know.

Again stating that you should have written your editorial when you were in Blairmore, and carrying on the propaganda you suggest therein, we would advise you that the Crows' Nest Pass is fully protected from any outbursts of lawlessness by our mounted, provincial, town police and special police, who are regularly on duty and enforce the law rigidly and without fear or favor. If you do not believe this, write to Inspector Nicholson, formerly Sgt. Nicholson, who is now Inspector in the Liquor License Branch of the Attorney-General's department, and if you tell him that the Pass is not fully policed, you will get your answer. Furthermore their record will support this statement—facts are generally better than fiction.

Trusting that you will give this letter as great a prominence in your paper as you did your editorial "The Responsibilities of Citizenship," and the article entitled "Hell's Kitchen."

I remain, yours,

L. H. PUTNAM.

[The above is copy of a letter forwarded to The Province at Innisfail.]

The Alberta exhibit, which has been touring American State fairs, will be taken to exhibitions at Twin Butte, Montana; Pendleton, Oregon and Walla Walla, Washington. The exhibit has attracted much attention at the Montana and Utah State fairs, and should do much to acquaint Uncle Sam's people with the diversified resources of the best provinces north of the 49th.

CHRISTMAS IN THE OLD COUNTRY—SPECIAL ARRANGEMENTS

A visit to the Old Country is something that a great number of people are giving thought to at this season of the year, and many have already made plans to reach their friends in time for the Christmas and New Year season.

Canadian Pacific steamships are deservedly popular for this trip, and to give extra special accommodation for those who are going overseas this season the Canadian Pacific Railway has arranged for a special train to connect with the S.S. "Montcalm" sailing from St. John, Tuesday, December 12. Through tourist sleepers will be operated from Edmonton at 10 p.m., Thursday, December 7, and from Calgary at 1:35 a.m., Friday,

December 8, making connection with this special train leaving Winnipeg 9:20 a.m., December 9.

Special tourist sleepers from Calgary, Edmonton, via regular trains will also be operated in connection with sailings from St. John of the S.S. "Montrose" on December 1st, S.S. "Victorian" December 7th, S.S. "Melita" December 9th, S.S. "Metamora" December 16th.

All these tourist sleepers run right to the ship's side—no changes no inconvenience. They are the gang plank to the steamer.

CHILDREN COMPETE FOR FORESTRY ESSAY PRIZE

Scores of school children in every

school district of the Dominion are competing in the annual school essay competition on Forestry and Tree Planting, inaugurated recently by the Canadian Forestry Association.

Questions as to the resources of Canada, the damage done by forest fires, what trees to choose for planting and how to plant them are being asked by a multitude of young people and the resultant information is being applied to the essay competition.

Three substantial cash prizes are being given in each province and the effect of the national effort to stimulate juvenile interest in the forest resources of the country and the multiple benefits of tree planting has secured the hearty endorsement of all departments of education which are giving every co-operation.

THE RESPONSIBILITIES OF CITIZENSHIP

To the Editor of the Province, Innisfail, Alberta:

Sir: My attention has been directed to an article which appeared in your paper under date of Thursday, Sept. 28th, 1922, as an editorial, "Responsibilities of Citizenship," and an item entitled, "Hell's Kitchen." These call for a note of protest and I for one will do so.

It is very annoying to old residents of this district that such unjust remarks are given such undue prominence in a newspaper such as you publish and which undoubtedly has a large circulation in your district. In fact it is deplorable to think that such articles would appear in any paper anywhere, or even similar statements made concerning this district. There is nothing like the lawlessness in proportion to the population of the Pass, as there is in other districts of the Province of Alberta.

You refer to bootlegging in this district, but you say nothing about the bootlegging in other districts, except to state that bootleggers are of the same type wherever you find them.

Your articles would lead one to think that this district is something terrible. As you do not state that there is less murder, robbery, house-breaking, forgery, cocaine or prohibited drugs; and last but by no means least that awful crime of "moonshining" and illicit distilleries in this district than in any other district in Alberta in proportion to the population.

You speak of the foreign born of Blairmore, which statement is most slanderous and unfounded, especially from a man who lived in this district for a considerable time, and whom I believe was held in high respect in the community. You speak

LIGHT-SIX
TOURING
\$1375Studebaker
"Built-in-Canada"

Incomparable Among Light Cars

You need only go over the Studebaker Light-Six, feature by feature, to appreciate how much more it gives in quality, performance and completeness than the price indicates.

Light-Six quality is due to the use of only the finest grades of material throughout, and the employment of the highest standards of workmanship known to the automobile industry.

Its completeness is indicated by such features of standard equipment as: cow ventilator; parking lights; large rectangular plate glass window in rear; thick proof transmission lock which reduces the insurance rate 15 to 20%; thermostatically controlled cooling system; genuine leather upholstery; 9-inch

deep seat cushions, and cord tires.

As to performance, the Light-Six is unrivaled among lightweight automobiles for the quietness of its power and its freedom from vibration. It is noted, too, for the economy in fuel which its exclusive Internal Hot Spot assures. Other important factors that contribute to the remarkable performance of the Light-Six are its inclined valves and completely machined crankshaft and connecting rods.

Come today and see the Light-Six—ride in it—drive it yourself. You will realize why the name Studebaker on vehicles has been a symbol of dependability for more than seventy years.

THE CANTAPILLER

There are forty thousand kinds of things that crawl and fly and creep. That chase a fellow while awake and bite him in his sleep. Hornets, ants and bumblebees, centipedes and bats. Spiders, daddy-long-legs, and striped buff'd gnats. Fleas and chiggers, no-see-ums and the rest. But have you ever bumped against the cantapiller pest.

It's a big two-legged creature with a dish-rag for a spine. A wish-bone for a breastbone and a taste exceeding fine. For keeping out of sight and sound of every kind of work. An expert with excuses and crackery-jack to shirk. It is fun to crack a flea or fly; but, oh, what ardent zest. Could I employ to pulverize the cantapiller pest.

Have you ever lain upon your bunk with the light too dim to see. And listen to a skeeter vocalizing in high C. And taking aerial photographs of your anatomy. To determine where the choicest spot

for boring you might be? Have you heard an angry hornet—seen the lightning in his tail. Sweet music—when considered with the cantapiller's wail.

Oh, the cantapiller can't all day from morning until night. He can't do things in darkness and can't do them in the light. He can't build fires or cook his grub. He can't keep his things in place. Can't follow trails or find first aid—can't even wash his face. I'm sick and tired of can't, can't, can't, so sick that say, by gee! This cantapiller cantapiller pest, can't go to camp with me!

"Boy Scout Magazine."

The grand secret of success is that successful men take one hundred times the trouble that men usually do.

If you are too large for the place you occupy, you are too small for it.

What is more pathetic than the conscious possession of great power?

The gifted man is he who sees the essential point.

ITALIAN CITIZEN REPLIES TO DILLINGHAM

In reply to a scurrilous article contained in a recent issue of The Province, published at Inisfail, we understand that a letter has been sent to the editor of that paper for publication, a copy of which we quote below:

"Blairmore, Alberta,
October 10th, 1922.
To H. C. Dillingham, Esq.,
Editor The Province,
Inisfail, Alberta.

Dear Sir:
In a recent issue of your paper you published an article entitled "The Responsibilities of Citizenship." Even though said article is quite open to criticism and contradiction, I will limit myself to merely drawing your attention to a certain statement contained therein, which I, of foreign birth, consider unworthy of a real Canadian.

You state: "One must consider that the larger part of the population of Blairmore is foreign born, whose standards of morality are lower than many of the beasts of the field."

Thank you, Mr. Dillingham. And may I ask of you, where and what are the standards of morality of any person making such a statement? Can it be possible that you were not wholly and entirely free from the bootlegger's spell when making it? If such really may have been the case, then I do not hesitate in saying that there must be something radically wrong with the functioning of your mental faculties.

You go so far as to include foreigners in general, and I presume Italians in particular. Surely this cannot be a sample of British traditions of fair play and justice.

Hopeing that you will not fail to give this letter the same publicity which you gave the article herein referred to.

I am, sir,
Respectfully yours,
A. FABRO."

FUNERAL OF SAMUEL McVICAR

The funeral of the late Samuel McVicar, whose death took place on the evening of Wednesday, September 27, was held on Tuesday, October 3rd, at the Three Hills cemetery.

Mr. McVicar's death was the result of an accident the same afternoon, when he fell from the tippie at the Fallside Mine while endeavoring to check the fire which had gained a hold on the woodwork. A fractured spine and internal injuries were the cause of death.

An inquest was held on Thursday by Coroner T. Sawden, the jury being composed of T. J. Kelly, foreman; J. E. McFee, I. H. Waterman, R. C. Robertson, Rev. W. C. Marsh and W. K. Evans. Mine Inspector Cranston, of Camrose, and Const. R. H. Purdy, A.F.F., of Trochu, attended and a verdict of "Accidental Death" was returned.

Mrs. McVicar and two daughters were in New York and the funeral arrangements were held over until after the arrival of Mrs. McVicar in Three Hills on Monday. Others present were Robert McVicar, of Edmonton, brother; Mr. and Mrs. Hugh McVicar, of Hileret, cousin; J. B. Cleary, of Calgary; W. J. Connolly and D. E. Smyth, of Coalpur; W. W. Berridge, of Calgary; Walter and Sidney Moody, of Calgary, brothers of Mrs. McVicar.

The funeral service at the church was conducted by Rev. W. C. Marsh and at the graveside the local deceased lodge took charge, the deceased being a member of that order. There were a large number of floral tributes and many friends followed to the cemetery. The Fallside Mine was closed for the afternoon and the employees attended in a body.

Mr. McVicar was 42 years of age, born in Cape Breton, and he resided in the west for many years. He was president and manager of the Fallside Coal Co., and was highly esteemed by all—Three Hills Capital.

It is only of the loftiest trees that it occurs to us to remark that they do not touch the sky.—Higginson.

THE PAST THIRTEEN YEARS AGO

(From Frank Paper, January, 1908.)

The village council elections in Frank resulted in the return of A. V. Lank, R. Steeves and Dr. Malcolmson as councillors. Jake Whiller had a narrow escape. At Coleman Messrs. Alex. Cameron, Frank Graham and E. Holmes were returned. The successful candidates at Blairmore were T. Frayer, H. E. Lyon and L. Dutil. Joe Little was disqualified for running through the fact of his residence being outside the village limits.

The International Coal & Coke Company, of Coleman, will pay its first quarterly dividend the first of February, amounting to two per cent., or a total of \$56,000. With the payment of this dividend the International will have paid a total of \$210,000 in dividends, being the only western coal company that has ever reached a dividend basis during the first four years of its life and the only one in Canada to pay eight per cent. per annum.

Raoul Green, formerly superintendent for the West Canadian Collieries at Lille, but who is to remove to Blairmore to become assistant manager, returned the first part of the week accompanied by Mrs. Green. They were given a rousing reception by the people of Lille.

At the meeting of the Associated Boards of Trade held at Lethbridge, petitions were presented by the Frank Board of Trade, praying for a wagon road from Crow's Nest to the prairies and for an amendment to the village ordinances empowering villages to levy a poll tax.

The Blairmore hockeyists were in great glee last week. In their second match with the Lethbridge boys on McGill's rink they won by four goals to two. J. A. McDonald was referee. The Blairmore team was made up of Ray Beard, goal; Stanley Boyle, point; Henry Parke, cover point; William Parke, rover; Charles Kanouse, centre; W. Goddard, right wing and A. Parke left wing. Goddard scored one goal and Kanouse three.

February—Messrs. A. V. Lang, of Frank; H. E. Lyon, of Blairmore; W. P. Williams, of Lille, and Alex. Cameron, of Coleman, returned the early part of the week from Edmonton. They state that as a result of their trip to the capital the villages concerned will be empowered to levy a poll tax for municipal improvements.

Mike Phillips, suspected murderer of Monte Lewis in her resort at Blairmore, on the night of November 19th, was captured Friday night at the town of Andrew, near the buffalo park northeast of Edmonton, where he had called to see his wife.

A news dispatch from Fernie states that a murder was committed there on Tuesday night. The victim was J. R. Cameron, who was stabbed to death by two Italians.

One of the most distressingly and minor accidents that has ever occurred in The Pass, ended the life of "Danny" McNeill in one of the mines of the West Canadian Collieries at Lille on February 12th. Danny came to Frank in the fall of 1901. He was married in 1906 to Miss Francis Banner, by whom he is survived, together with their thirteen-month-old baby.

A bill has passed the British Columbia legislature, granting a charter for a new railroad from the Crow's Nest line to the International boundary through the Flathead. D. C. Corbin, the promoter, gave a bond of \$25,000 to complete the road within a year. The new line is to leave the Crow road near McGillivray.

The Frank Paper now has a telephone. The number is 11. Don't fail to phone in your news items and incidentally you might call us up when you want job work.

The thing in this world I am most afraid of is fear.

"Say—That's Some Cake! Who Made It?"

And then mother speaks up with well deserved pride and says, "I did," and tomorrow she will get out her Dr. Price's Cook Book and the can of Dr. Price's Cream Baking Powder and bake another masterpiece just for the sake of true appreciation.

September 19th, 19—
I went to church on Sunday, for the first time since I left Winnipeg. It was a beautiful morning, and at breakfast Mrs. Bingham suggested that we should all go to evening service at the Indian Mission on the Reserve, twelve miles away. Ever since coming here I have wished to visit the Reserve, so I was greatly pleased when Mrs. Bingham proposed. I went with Mrs. Bingham and Mr. Livingston. We had luncheon early, for we wished to be at the Mission in time to call on some of the Indian celebrities before tea, as the service was directly afterwards.

Halfway between the Bar and the Mission we came to the "dip," and I got out to see it, with Mr. Livingston as showman. I don't suppose you know what a "dip" is, so I shall describe it as best I can. At first I thought that the wooden structure I saw was a bridge. It certainly looked like one, but why build a bridge over dry land? And why build it so narrow? To add to my mystification, when I reached the end of the sloping approach I found myself looking down into a reservoir full of water. Mr. Livingston evidently enjoyed my astonishment—I believe he would have enjoyed it even had I fallen into the water—and after waiting in vain for me to speak and display my ignorance, he told me quite seriously that most of the Bar B cattle were shipped to England, and that the British authorities would not allow them to land until assured that they had been given the water treatment. I laughed, so he finally told me that ranchers were compelled by law to "dip" their cattle in an antiseptic solution before shipping them to this to prevent the spread of mange or other similar diseases. The cattle are driven up the approach, and when they come to the water there is nothing for them to do but get into it; both approach and reservoir are too narrow for them to turn in. There is a gradually sloping floor in the reservoir, and before they know what is happening to them the bewildered cattle find themselves in water too deep to wade in, and are therefore forced to swim. In this way the chemically treated water covers them all but their heads. Quite clever, is it not? And wouldn't it be a perfectly lovely way to bathe refractory small boys?

A hill around which the road winds hid us from the Mission until we were within half a mile of it. To my surprise, the many buildings connected with the Agency and the Mission made a good-sized village, and—to my

WITH THE MOTH

Concerning a Terror Inspiring Moth

AVE you ever seen a human moth? It is not, I admit, an attractive thing to look at, or even a cheerful thing, but I am going to tell you about a lovely little creature that even though it has a very clearly drawn likeness of a skull decorating the top of its soft velvety body is perfectly gay, happy and beautiful, and all that in spite of its being The Death's Head Hawk Moth.

I know a little boy who was sitting up quite late one night studying his history lesson, as he wanted to be the best in his class for the examination. It was late spring when exciting things are such examinations occur in school. It also was quite a warm evening, so that the windows were open and the boy was grateful for the breeze that blew in from the garden.

Suddenly something else blew, or I should say, flew, in with such a loud whirling of wings that the boy was startled. He jumped up, with no thought for his history, but quite intent on what he at first thought was a bat, for it was bumping itself now here, now there against the ceiling and walls. Finally it was caught, and the boy was so amazed and delighted that, very gently holding it in his hand, he ran to show it his small sister.

It was a Death's Head Hawk Moth, but they didn't know that. To them it was merely a terrible thing, for wasn't there a distinct skull outlined atop it? The little boy's old aunt burst into tears, his mother seemed anxious and even his father, who is a rule was a most sensible person, looked slightly uncomfortable, while the two children, about it was an awful sign of misfortune—of death. She was all for killing it, but the boy ran back to his room and carefully let the Moth out of the open window back into the velvet black of the night. Instead then of directly returning to his history, he first opened another book, one about Moths and butterflies, and searching through the innumerable pages he found an exact copy of his little winged visitor. Having read all about it, he returned to his history.

But no misfortune fell on the boy or on his frightened family. On the contrary, they were very happy, and particularly so was the boy on account of his experience. Every evening he bowed his Hawk Moth friend would again flutter through the window toward his light, but as this Moth is quite rare it never returned. Others came, however—ever so many others—all of different shapes and sizes. Always looked them up in his book and learned all about them before releasing them back to the darkness. This boy later became a great naturalist; just because a wonderfully tinted Moth flew into one evening with his message of love.

The Hawk Moth or Sphinx family is a very large one of which there are many different kinds. One of the most famous of which are the Hawk Moth, the Privet Hawk Moth, the big and little Elephant Hawk Moths, the Hummingbird Hawk Moths, and, last and largest, the Death's Head. This one is seldom seen at night. It is protected during daylight by cleverly choosing a resting place that is like its own coloring. If disturbed it has the uncanny gift of squeaking an angry protest. The young of this Moth, when full grown, are very large, being similar to large, five-inch long Caterpillars. They are lemon green, with seven severe purple yellow stripes on either side. They feed mostly on potato plants and dig several inches down into the soil when they intend spinning the cocoon, where they remain for several months before returning to the world as Moths.

Copyright, 1922.

greater surprise—a very picturesque one. They are situated in a fan-shaped hollow amidst the hills, are all painted white, and are surrounded by trees and gardens.

We drove directly to the residence of the Indian Agent. His wife, a friendly little woman of forty or so, met us with a hearty welcome. In five minutes she was telling us all the news of the reservation, and, telling me how lonely she found life on the Reserve. She was a governess, so Mrs. Bingham, who came out from England to teach the children of the man who owned the ranch where Mr. Bingham lives—and within a year she married the Indian Agent! Single women in Alberta have need to be wary indeed.

By the way, an Indian Agent is not an Indian agent. He is the man appointed by the Government to look after the temporal affairs of the Indians, and is usually a very capable and scandal-free person of fairly good position, a person of fairly good position, a person of fairly good position.

At the first opportunity Mrs. Bingham told Mrs. Davidson, our hostess, that I wanted to see the "dip," but it was not until after we had promised to return for tea that Mrs. Bingham said she would take me, and me, and Mr. Bingham and Sunny stayed with her. Mrs. Bingham did not enjoy "wandering around like a party of Cook's tour-ists."

The largest of the Mission buildings is the school. It would need to be large, for there are nearly a hundred children in attendance. As "real Indians" the children were rather disappointing. The boys were smart dark blue uniforms. The girls too, all dressed alike, though not to as good advantage as the boys; but the feminine love of adornment finds expression in hair-ribbons of every color of the rainbow and a few never seen in any rainbow. The girls are not at all pretty, but they have very sweet voices, and a half-shy manner that is altogether charming. All the children go to school half of each day. During the other half-day the boys are taught carpentering and farming, and the girls learn to cook and sew and "keep house" generally. They all seemed to be as healthy and happy as children could well be.

A deaconess with a sanctimonious way of talking, and an unaccountable way of looking at Mr. Livingston, showed us the school. I detest goody-goody people. She is young and not by any means plain, and I suppose her enthusiasm to be of some use to suffering humanity is beginning to grow cold. But I really do not think that she should waste her arts on Mr. Livingston; he is scarcely the sort of man to be taken in by the purring type of women. Of course one never knows; he may like to be purred over. I was rather glad to get away from her; she rubbed me the wrong way. I felt like contradicting everything she said, even if she expressed what was my own opinion a moment ago.

Once outside again we walked around the gardens and looked at the outbuildings and buildings, many of course, being closed for the day. And then we made two calls. The first celebrity to whom I paid my respects was a dear old lady—she was "lady" advisedly—by the name of Ellen Prince of Wales. She had an other surname once, but upon learning that she was of the same age as the late King Edward, she changed to the more distinguished title. With her son and his wife and children she

Greeks Foretold Weather
The ancient Greeks were well versed in weather lore, especially the relationship between wind directions and weather sequences.

TIED AND RUN DOWN

Lydia E. Pinkham's Vegetable Compound Helped Where Other Medicines Failed

Vancouver, B. C.—"I took Lydia E. Pinkham's Vegetable Compound because I was tired and run down. I had headaches and no appetite and was troubled for two years with sleeplessness. I tried many remedies but nothing did me any real good. While I was living in Washington I was recommended by a friend to take the Vegetable Compound. I am stronger and feel fine since then and am able to do my housework. It is an amazing fact that I use these facts as a testimonial." Mrs. J. C. Guevara, 711 Horley St., Vancouver, British Columbia.

Many women keep about their work when it is a great effort because the work makes them feel fine. Lydia E. Pinkham's Vegetable Compound has brought relief to thousands of tired housewives by removing the troubles which cause annoying symptoms. If you are suffering from nervousness, headache, or dizziness, or if you are right or left side, tired and run down, feel like Lydia E. Pinkham's Vegetable Compound. Just bear in mind this medicine has been used by women for nearly fifty years. This is a long time for a medicine to stand upon the foundation of merit.

Keep Them Growing
Children who are over-thin, listless or delicate, should take
Scott's Emulsion
regularly every day as an aid to growth and sturdiness.
Nothing surpasses Scott's Emulsion as a tonic-nutrient for a child of any age.
Scott's Emulsion, Toronto, Ont.

Livestock Receipts At The Leading Markets

Heavy Increase Shown in Western Shipments of Livestock

According to the Dominion Livestock Branch weekly report, some of the receipts at livestock markets of the Dominion show considerable decreases in cattle receipts from the first of the year to early in September, as compared with the receipts during the same period of last year. The important yards at St. Boniface, Manitoba, however, is reported as showing heavy increases, the numbers marketed during the present year to date as compared with last year being greater by 7,000 head, when compared with offerings of the same period of 1921. The increases in cattle marketings in the western provinces are duplicated by the calf, sheep and hog marketings and more than offset any decreases in marketings in the eastern provinces. The result is that the combined receipts at all yards in the Dominion are in every class in excess of those of the same period of last year. The Toronto and Montreal markets are behind in cattle receipts, Montreal is off in calves and Toronto in sheep, but the combined receipts to September 7th at Toronto, Montreal, Winnipeg, Calgary and Edmonton, as compared with the receipts of the same period last year are: 45,597 cattle, against 37,620; 156,476 calves, against 135,900; 510,653 hogs, against 403,777; and 253,467 sheep, against 239,461.

Top prices on September 14th show as 25c to 75c per hundredweight lower on cattle than on the same date of the preceding year, although the market appeared to be 25c stronger. Calves showed a relatively sharp decline. Hogs were higher at Toronto and Montreal but lower at Winnipeg, Calgary and Edmonton. The prices on choice sheep and lambs were higher at all markets excepting Winnipeg, where the quotations for lambs were on a somewhat weak basis.

PUT STOMACH IN ORDER AT ONCE

"Pape's Diapiesin" for
Gas, Indigestion or
Sour Stomach

Instantly! Stomach corrected! You never feel the slightest distress from indigestion or a sour, acid, gassy stomach, after you eat a tablet of "Pape's Diapiesin." The moment it reaches the stomach, all sourness, flatulence, heartburn, gases, palpitation and pain disappear. Druggists grant each such page to correct digestion at once. End your stomach trouble for a few cents.

How Indians Harvest Grain

Wild Rice Used By Indians of North America

Man-Noh-Min, "the wild rice of the north, the Indian's grain for winter consumption, is gathered today as it was in the days of Hiawatha and Minnehaha. Canoes are piloted through miles of rice beds. The rice is either snipped off on the stem or pulled from the water. Taken into the canoe, it is dislodged, from the stem by beating with a paddle. The hulling is done by heating the rice in its shell, and while it is yet hot it is treaded by moccasined feet. Wild rice is a tall aquatic perennial grass of North America and of Asia. Its grain or seed has been used by the Indians for food since time out of memory.

The work of gathering the rice is so tedious that few white people attempt it.

Alberta Coal Production

Coal production in the Drumheller fields has mounted to 6,325 tons daily and will shortly be increased to between 8,000 and 9,000 tons. All the coal camps in Alberta and Eastern British Columbia are now working, and much of the product is being shipped to Saskatchewan and Manitoba. It is expected ample coal will be mined to meet all the requirements of Western Canada.

Divided By Earthquakes

"How is the earth divided?" asked the teacher of the class. "By earthquakes," replied one boy promptly; and the teacher passed on quickly to another scholar.

Refuses a Pension

Lord Strathclyde Voluntarily—Rather—Assured Income of \$750 Pounds

Lord Strathclyde has astonished the official world by voluntarily relinquishing the pension of £370 a year that was granted him seven years ago when he retired from the office of Lord Advocate for Scotland, where he was sitting, £100 a year.

He is 69 years old and declares his reason for giving up the pension is that he is unable, owing to weak health, to take part in the judicial work of the House of Lords. That has only increased the surprise his action has occasioned. Such an exhibition of public spirit is rare indeed.

The British Government makes generous provision for the future welfare of its best-paid officeholders when they both the ranks of those who have retired. The speaker of the House of Commons has a salary of £5,000 a year; he may retire whenever he wants to and enjoy a life pension of £4,000 a year. The Lord Chancellor, who fills a role in the House of Lords analogous to the speaker of the House of Commons, receives a salary of £10,000 a year and retired pay of £5,000.

MOTHER!

Your Child's Bowels Need
"California Fig Syrup"

Harmony! Even a sick child loves the "fruitful" taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful today may prevent a sick child tomorrow. If constipated, bilious, nervous, fretful, has cold, cold, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

Honey Production in Manitoba

Within the past two years Manitoba has developed practically a new industry in beekeeping, which this year will bring to the province a revenue of \$400,000, according to the provincial statistician Floyd. Next year, declared this official, if the present development continues, this figure will be doubled. Approximately 1,000 beekeepers in Manitoba have produced 2,000,000 pounds of honey this year.

Decrease in Debt of Dominion

A further decrease in the net debt of Canada amounting to almost five million dollars, is shown in the statement for August issued by the Finance Department. The net debt August 31 was \$2,387,676,265, as compared with \$2,392,548,628, at the end of July.

Money Production in Manitoba

Within the past two years Manitoba has developed practically a new industry in beekeeping, which this year will bring to the province a revenue of \$400,000, according to the provincial statistician Floyd. Next year, declared this official, if the present development continues, this figure will be doubled. Approximately 1,000 beekeepers in Manitoba have produced 2,000,000 pounds of honey this year.

Money Thrown Away!

Specialist charged \$13 a week, \$1 worth of Zam-Buk, Saved Her Leg.

"I had only one week of the 'special' course of bad leg treatment supplied in my own city, and it cost me \$13 in coarse money. It was simply money thrown away," writes Mrs. James Elsworth, 802, Selkirk Ave., Winnipeg.

The cures first appeared on my left knee, and they spread from the top of my foot up to the knee. Laid up in bed helpless with pain, I was treated by five different doctors. I persevered with their lotions and ointments until I felt poor. Then one day I was brought a sample of Zam-Buk. Even this small quantity was decidedly soothing, and it encouraged me to get a supply from the druggist. Perseverance with Zam-Buk produced wonderful and thoroughly effective. The irritation and pain were speedily subdued; the ulcers were thoroughly cleansed of poisonous matter and the leg permanently healed.

Zam-Buk, the magic herbal balm, is equally good for eczema, ringworm, poison, wounds, pimples, boils, abscesses, piles, cuts, burns, scalds and all skin diseases. 60c. all dealers.

An Automatic Car Detective

New Invention Will Make Robbery a Difficult Matter

The robbing of motor cars has greatly increased of late. Sometimes the whole car is taken, and sometimes a rug, bag, or some other object is taken. The car is removed while it stands waiting.

These thefts have been particularly difficult to detect, but a new invention which has just been perfected and approved by the police authorities will make it difficult for the robber to escape.

An automatic detective is attached to the car—it may be placed in any part—and when it is set the slightest shaking or movement of the car will start a loud, long-range, electric hooter.

The authorities in places where the automatic detective is at work have agreed to give instruction that any motor car sounding this note will be stopped.

When the owner, after making a call, returns to his car, he touches a switch which renders the detective inoperative and quite unaffected by any movement. But when he leaves his car he turns on the switch by means of a kind of Yale key, which he takes away with him.

It is a splendid idea, and there will certainly be some excitement when the first of these "Stop, Thief!" sirens sound.

Automobile Export Trade

About thirty-four per cent of the automobiles now being used in India are made in Canada, according to a report from H. A. Chisholm. Owing to the British preferential tariff Canada is rapidly becoming the centre for the export of motor vehicles, and each year sees new companies from the United States establishing plants in Canada to take care of their export business.

Keep Minard's Liniment in the house

London's women police cost the city \$150,000 a year, although they have no real authority to make arrests.

Headaches Gone

Perhaps you can imagine what this means to one who has suffered terribly with headaches for ten years.

Read about it in this letter.

Mrs. Anna M. Smith, Country Harbor Cross Roads, N. S. writes:

"I feel that if anyone can recommend Dr. Chase's Nerve Food, I suffered for ten years from severe headaches, and although I took all kinds of headache powders I just relieved me at the time. I became very nervous and run-down, and everything seemed to trouble me. I have taken eighteen boxes of Dr. Chase's Nerve Food and it has made an entirely new person of me. I felt that I could not have lived without it. I do not have one headache now for every hundred I used to have, and my nerves are good and strong. I began using Dr. Chase's Nerve Food, and now I weigh 121. Knowing what this treatment has done for me, I cannot too highly recommend it to others."

Dr. Chase's Nerve Food, 50c a box, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

Local and General Items

For funeral flowers phone 212. **Crows' Nest Pass Undertaking Co.** Nanton's school was cleared in forty seconds at a recent fire drill.

Mr. and Mrs. M. Belecky returned on Sunday last from Fernie.

The business partnership of Kefoury Brothers at Fernie has been dissolved.

Mr. and Mrs. Herchper and Mr. and Mrs. A. B. Trites were down from Fernie on Sunday last.

Henry Ford has set a new production mark and hopes soon to be turning out six thousand cars a day.

Welsh coal is being used by the Newfoundland railway at a cost of one dollar less than Sydney coal.

An action for divorce has been entered by Mr. B. C. Morton against R. P. Morton, both formerly of Blairmore.

Mrs. E. Hinds returned this week from a two months' visit with relatives and friends at Stillwater, Minnesota.

L. Dutil was in Three Hills from Monday to Wednesday of last week, in connection with the change of management of his store there.

James Burrows came down from Columbia Gardens on Friday last and hopes to spend the winter with us, providing work at the local mine is offering.

The smelting company at Trail voluntarily granted a substantial increase in pay to all employees last week. The increased wages will continue for at least six months.

A company has been formed in Newfoundland with a capitalization of half a million dollars for the purpose of importing and dealing in Welsh coal and pit props.

It is somewhat amusing to note that the police are putting a stop to slot machines, dice, punch boards, etc., but allowing football and other gambling competitions to be conducted by the Calgary, Edmonton and other players.

With but one dissenting voice the provincial synod of Ontario of the Church of England voted to open the doorway to their church to ministers of other denominations. The decision is described as a decided step towards church union.

Mr. and Mrs. Ben Snyder continued their trip towards California on Sunday last. They will spend about six months in the south before returning to Lethbridge, where Mr. Snyder occupies the position of meat cutter in one of P. Burns' branches.

The Harvest Thanksgiving service at the Union church on Sunday night last, was greeted by the largest audience in the history of the church. Pit, balcony, aisles and standing room were all occupied. The church was tastefully decorated and the service was impressive.

H. O. Boston, representing the Edmonton Board of Trade, was in town this week in the interest of the new history of Alberta being compiled under the supervision of Mr. John Blue, provincial librarian. While here Mr. Boston gathered volumes of historical material.

The Michel football team carried off the Crahan cup on Saturday last, having played the final with Blairmore on Hillcrest grounds that evening. Circumstances were not at all favorable to the game, a high wind blowing in Michel's favor for the first half of the game. The score was three to one.

Charlie Chestnut left last week for the coal fields up north.

The Giants have captured the world's baseball championship.

Monday, November the 6th, will be Thanksgiving Day this year.

W. R. Hearst's income for this year will be at least twelve million dollars.

F. Roberge has moved his family from Lundbreck to Blairmore, where they will reside in future.

Not until after December will the rule "Turn to the right" be observed in the province of New Brunswick.

The Ladies Football Club will hold their first annual dance in the Union Hall at Hillcrest on Tuesday night next, October the 17th.

Wilbur L. Foley, principal of the Natal public school, was visiting last week end with Mr. and Mrs. D. F. Fleming on State Street East.

Canadian Pacific Railway officials announced on Monday that excursion fares will be offered by that company from Manitoba, Saskatchewan and Alberta, to Vancouver, Victoria and New Westminster, on certain dates to be named later, during December, January and February.

At the recent session of the Sovereign Grand Lodge of the Independent Order of Odd-fellows, held at Detroit, the organization of junior classes of Oddfellows was authorized. This means that in future junior branches of the order can be formed, composed of boys from 14 to 21, who are sons of Odd-fellows.

Why the government allows moving pictures to be shown in this country of men like "Bill" Hart, who portrays the characters of bandits, is beyond my comprehension, said Magistrate Burton in county police court, Toronto, when he sentenced several young boys for stealing.

Using the Calgary, Alberta's term, the "Gates of Hell" are now guarded by the Alberta provincial police and the only avenue through which booze can be squeezed is through a subterranean pipe, by airplane or pack-horse. Of course, there is nothing to stop a man from resting a few minutes just outside the gates and swallowing the contents of his gallon jug.

The news reached the Pass last week end of the death of Mrs. Elizabeth Brehler, which occurred at Rugby, North Dakota. Mrs. Brehler was well past the three-score-and-ten mark and up until very recently had been a resident of Hillcrest, Alberta. Joseph Brehler, well known traveller from Lethbridge on the Pass territory, is a son.

At the Union church on Sunday night last, during the singing of the second hymn, a little girl stood singing with an open book before her. A friend behind noticed that this was a toy book and the verse on the open pages read: "Eney, meny, minney, mo; catch a nigger by the toe; if he hobbles let him go; eney, meny, minney, mo."

The endeavors of elderly ladies at Edmonton to make themselves look young by bobbing their hair, painting their faces and shortening their skirts have caused complications in the carrying out of the curfew regulations. To get over the inconvenience, the curfew regulations are being changed to make the age of those liable to be arrested for being out after nine o'clock at thirteen years.

Major School, of Clareholm, has returned home in a week's visit to the big game country above the G.P. He returned via Frank and Blairmore.

Stanley Mackenzie, of Bridge water, Nova Scotia, spent the week here with his uncle and aunt, Mr. and Mrs. L. H. Putnam. Mr. Mackenzie served with the Royal Canadian Regiment overseas for four years.

O. M. Forhan and family have moved from Red Deer to Vancouver, where they will make their future home. Mr. Forhan was for a time manager of the Blairmore Pharmacy, several years ago.

Miss Agnes Pelletier has resigned her position with the Fernie Brewing Co. and has accepted a position with the Dominion Chautauques. After a short stay at her home in Pincher Creek, Miss Pelletier will proceed to Calgary to enter upon her new duties.

A number of offenders against the Alberta Liquor Act appeared before Magistrate Giessem last week and paid fines running from \$25 to \$200. Difference in circumstances surrounding the various cases to warrant such a discrepancy in penalties is not generally known.

The C. P. R. wrecking train arrived here at six o'clock on Friday morning last and in less than four hours the upturned cars were placed on the tracks, the debris cleared away and the spur line placed in condition to allow resumption of traffic from Blairmore mines.

The following figures are gathered from the report submitted at the annual conference of the Methodist church of Canada at Toronto last week: Total membership of the church 406,933; membership of young people's organizations 124,632; Sunday school force, including officers and teachers, 474,359; total amount given for all purposes by Sunday school and young people's organizations \$3,088,658; total gifts of the church for all purposes \$37,380,477; gifts for missions \$4,280,980; total value of church property \$55,043,891.

In British Columbia the guest gentleman in the land may enter a vendor's store and purchase his choice of alcoholic beverage. He may carry same openly in his hand or concealed in his hip pocket, and still be looked upon by the less radical or extreme as a gentleman. In Alberta he only has to have with him a half a naggin of anything containing alcohol to be branded and looked upon as a criminal. As a result, for every criminal in British Columbia, Alberta has fifty; for every drunk picked up in British Columbia, fifty can be apprehended in this province. This moral reform seems to be working at both ends and the leak runs into the coffers, directly or indirectly, of agitators, moral reformers or those connected with the enforcement of the Alberta Liquor Act.

Recently an American auto tourist party was kindly entertained at Cranbrook and Fernie. At Fernie they were obliged to procure from a government vendor's store a few ounces of liquor for medicinal purposes, owing to the indisposition of a lady of the party. The party were differently entertained in Blairmore. Their car was stopped and searched, the remaining portion of the liquor was taken from them and they were obliged to pay a \$25 fine for having the liquor in their possession, in spite of their statement that it was kept for medicinal purposes only. If such a reception is to be accorded tourists to Canada it is not long before the much desired tourist traffic will be at an end—thanks to an ill-devised piece of legislation.

A GENERAL MEETING

of the
BLAIRMORE BOARD OF TRADE
will be held in the Masonic Hall, Monday, October 16th, at 8 p. m. All members and others interested are requested to attend.
Membership Fee \$1.00.

There is always a Cape Horn in one's life that one weathers or wrecks oneself on.—Huxley.

The whist party held on Monday night at the St. Anne's rectory, was fairly well attended. Prizes were won by Miss Cecille Marquis, Mrs. B. Green, Mr. L. Dutil and Mr. James Lote.

It is absurd to think that one's own age of the world is beyond correction by the next age.

A man broke his neck in Chicago two or three weeks ago. Modern surgery took hold of him and on September the 26th he was sitting up, practically recovered. Modern lovers, take notice!

The bottom of the North Atlantic is one of the widest and most even plains in the world. If the sea were drained off, a wagon might be driven all the way from Valentia, on the west coast of Ireland, to Newfoundland.

Constable R. G. McBeath, V.C. of Vancouver city police force, was fatally shot and detective R. S. Quirk was wounded in the left hand and head at an early hour Monday morning when they attempted to arrest a negro. The negro was later captured.

TENDERS

For the Supply of Coal to Provincial Government Buildings and Institutions

Scaled Tenders for the supply of Coal to Provincial Buildings and Institutions will be received by the Undersigned and opened publicly at twelve o'clock noon, October 17th, 1922.

Complete Specifications and Form of Tender may be obtained on application to B. P. Blackie, F.R.I.B.A., Provincial Architect, Edmonton, Alberta.

The right is reserved to reject any or all tenders.
